

Quick response.
Quick support.
QwickComfort.

To provide an added level of support for memory care residents, Atria North Point is collaborating with Wicked Technologies to offer the QwickComfort Program.

Using first-of-its-kind technology, the program makes it easier and more efficient for staff to respond to incontinence-related events.

How the program works:

- Sensors on the mattress pad detect moisture in real-time
- When moisture is detected, an alert is sent to Atria's care team
- Even minor leaks and spills are detected within seconds

How the program benefits residents:

- Faster response times
- Protects skin health
- Lowers risk of incontinence-related urinary tract infections
- Faster and safer linen changes
- Fewer sleep interruptions
- Better quality of life

To learn more about the QwickComfort Program or ask questions, contact Atria North Point today at 770.650.9577.
